

BOOZE EXPERIENCES

	Hosted Infusion Station	Blind Tasting Game
Duration	90 Minutes	45 Minutes
How many drinks received	3 to 4	3
Description	Hosted infusion station - a selection of our house infusions displayed in beautiful decanters featuring the major spirit categories. The Booze Engineer host will be able to give guests infusions to sample and guide them on which mixers work best with different drinks. Guests will then be able to finish off their drink with a selection of house mixers and garnishes.	Guess the infusion - Guests are asked to guess the spirit and the ingredients in a selection of our more 'out-there' infusions. Usually four different infusions are sampled. Each infusion can be served on it's own station. Prize awarded to the individual guest or team who guess correctly (or even remotely close!)
Works best for...	Bolting onto an event to bring some hosted interaction with guests rather than a classic bar.	Experiential events where guests want interaction. Also opt in / out so can work in the corner of the room and guests discover as and when they like. Events with lots of things going on for entertainment.
Not ideal for...	Anyone who wants a personal touch, this is drinks for the masses.	Shy guests or those that do not want to be engaged with or interrupted.

	The Gin Lab	Tales From The Booze Lab
Duration	60 Minutes	60 Minutes
How many drinks received	4	2
Description	Make your own infused gin - the Booze Engineer will take you through the steps to make your own infused gin at the Ginspiration table. Why not bring your own ingredient? You will also be able to blind taste some of our weird and wonderful infusions plus sample, compare and contrast your favourite commercial gins.	Our Booze Engineers will drop the knowledge on our very own unique infused spirits and give you the stories behind some of the weird and wonderful flavours. Sessions include an arrival cocktail and an infusion box with delights from the Booze Lab for you to explore. There will even be an opportunity afterwards to check out the rest of the venue and try more of our in-house creations.
Works best for...	Lots of participation. Can be chaotic and fun rather than strictly timed, or well behaved depending on the guests."	
Not ideal for...	Large groups as this requires the whole room to pay attention for the lecture. Also requires space to move around and set up.
